

CS335: Compiler Design

Project Milestone 2

Group 6

Group 6 members:

Shivang Pandey (200941)

Devesh Shukla (200322)

Yash Gupta (190997)

1 Milestone 1

1.1 Git tag:

The git tag for this submission is:

`milestone2-3`

1.2 Tools used:

Flex, Bison, g++, C/C++

1.3 Compilation instructions

In the `milestone2/src/` directory, run the following command to generate the executable `main`:

```
make
```

1.4 Execution instructions

Let's say the input file is `input.py` and the output directory is `output_dir/`. The `-verbose` flag is optional. In the `milestone2/src/` directory, run `main` using the command:

```
./main -verbose -input input.py -output output_dir/
```

This will dump the symbol tables in CSV files and 3AC in `3ac.log` in `output_dir/` and the log files containing debugging information in `output_dir/lexer.log` and `output_dir/parser.log`.

1.5 Command line options

Usage: `./main [-verbose] -input <input_file> -output <output_dir>`

-input: Input file to parse.

-output: Output directory to dump the symbol tables and the 3AC.

-verbose: Show verbose output.
